

BABERGH DISTRICT COUNCIL

From: Head of Corporate Organisation	Report Number: M82
To: Overview and Scrutiny (Stewardship) Committee	Date of meeting: 20 September 2012

PERFORMANCE MONITORING QUARTER ONE 2012/13 – BALANCED SCORECARD AS AT 30 JUNE 2012

1. Purpose of Report

- 1.1 To report on Council performance for the 1st quarter of 2012/13 using the approach approved by the Strategy Committee in the 'Performance Monitoring and Reporting Framework 2012/13' report on 10 May 2012. The report approved by Members identified the outline key principles and the measures to be included in a Balanced Scorecard (see Appendix A). This included key measures from the joint Delivery Plan 2012/13 which was approved by the Strategy Committee on 12 April 2012 (see link provided to the approved Delivery Plan at the end of this report).
- 1.2 Work is underway in developing the Balanced Scorecard approach to provide a more rounded picture of operational performance and transformation and integration work. This report is the first in the new format and identifies key achievements and areas where further improvement is required as at 30 June 2012. The detailed Balanced Scorecard as at quarter 1 is attached at Appendix B.
- 1.3 The new corporate managers were not in post for the majority of this period, however along with the scale of the transformational activity, a concerted effort has been made to collate available data. This will be refined as part of the development of the Balanced Scorecard, to provide a more comprehensive and rounded picture of performance during the year.
- 1.4 To provide an update for Members on the two performance issues raised when the 'Finance, Risk and Performance Management – 2011/12 Year End Monitoring Report' was considered at this Committee's meeting on 17 July (Report number M53).
- 1.5 This report (Paper M72 refers) was presented to the Strategy Committee on 13 September, any issues raised by that Committee will be verbally reported at the meeting.

2. Recommendation

- 2.1 That the key points relating to operational performance, transformation and integration are noted.

The Committee is able to resolve this matter.

3. Financial Implications

3.1 There are no financial implications arising from this report.

4. Risk Management

Risk Description	Likelihood	Impact	Mitigation Measures
The Council does not actively monitor the performance of its key services and priorities and hence is not focussed on those matters or acts in a less efficient and/or effective manner.	Low	High	Balanced Scorecard principles agreed that focus attention on key measures. Regular performance management and monitoring undertaken.

5. Consultations

5.1 The contents of this report have been compiled in consultation with the relevant corporate managers and risk owners.

5.2 The high level principles surrounding the Balanced Scorecard were presented to JMIB in 2011 and early 2012 and approved by Strategy Committee in May 2012.

6. Equality Analysis

6.1 There are no equality and diversity implications arising from this monitoring report. Any specific issues that may arise are dealt with when individual actions are being progressed.

7. Shared Service / Partnership Implications

7.1 The Balanced Scorecard performance monitoring and reporting framework has been adopted by both Councils. Wherever practicable performance measures have been aligned. The integration and rationalisation of Significant Business Risks has resulted in risks also being better aligned with performance management through the Balanced Scorecard approach.

8. Key Information

8.1 Balanced Scorecard format

8.1.2 The Balanced Scorecard format and key measures approved by the Strategy Committee are shown at Appendix A and B respectively. The Scorecard provides performance data for each part of the organisation focusing on a continuous improvement approach rather than a restrictive targeted approach. Where appropriate it also includes comparative data for the same period last year.

8.1.3 The Scorecard reports a performance status using a colour code which identifies the expected position for the year end against the outcome. Where appropriate the Scorecard includes either a brief comment on the performance or reference to a paragraph in the report.

8.2 **Balanced Scorecard Performance Summary**

8.2.1 The key objectives for this transitional year are to achieve the benefits outlined in the integration and transformation business case, to undertake a robust strategic and financial planning programme leading to the setting of strategic priorities for 2013/14, and to provide assurance to Members that key services are delivering outcomes for service users during the year.

8.2.2 It is encouraging that during this intense period of transformational change, only 6 performance measures are currently under-performing:

- the number of private dwellings returned to occupation (see 8.3.2 below);
- the energy efficiency of local housing stock (see 8.3.2 below);
- the average time taken to re-let council housing (see 8.3.2 below);
- the percentage of local housing rent collected (see 8.3.2);
- progress in tackling under-occupation of council housing (see 8.3.2 below);
- meeting the nationally set targets for determining planning applications (see 8.4.2 below);

8.2.3 Three areas of good performance worthy of note at 30 June 2012 are: exceeding the number of planned council dwellings being adapted to meet the needs of older or disabled people (see 8.3.1 below); 45 households have been prevented from becoming homeless against a target of 50 (see 8.3.1 below); and exceeding the annual target of garden waste collection subscribers by 213 (see 8.4.1 below).

8.3 **Balanced Scorecard Performance - People Directorate**

8.3.1 Areas of good performance

Key Strategic Priority – Private sector and council dwellings adapted to meet the needs of older or disabled people - at 30 June 43 council dwellings had been adapted to meet the needs of older or disabled people against a target of 40. These included 13 adaptations costing more than £500 and 30 costing less than £500.

Key Strategic Priority – Number of households prevented from becoming homeless – at 30 June 45 households had been prevented from becoming homeless.

8.3.2 Areas of under performance

Key Strategic Priority – Private Dwellings returned to occupation – Members made a decision last year to remove financial assistance to return private dwellings to occupation. At the same time the internal restructuring meant that no staff were attending to this as a priority. As a result no dwellings have been returned for the period to 30 June 2012. An action plan has been drawn up to address the issues and it is currently anticipated that they will be resolved by 31 March 2013.

Key Strategic Priority – Energy efficiency of local housing stock (average SAP rating – Factors outside Babergh’s control have an adverse effect on the calculation of the SAP ratings e.g. the cost of energy is a factor, so that if energy costs rise, the SAP rating will fall. The rural nature of the district restricts the provision of a gas supply; this seriously restricts the ability to raise the SAP rating. A substantial boiler replacement programme is being undertaken, which will have a small effect on the SAP rating. The rating at 30 June was 65.5; the target is a minimum of 69. This target needs to be reconsidered and will be subject to further work.

Key Strategic Priority – Average time to re-let council houses – The average time to re-let council houses at 30 June was 34 days, the target is 23 days. Delays are due at least in part to low demand for sheltered housing in more rural areas. The process of aligning performance measurement and void management processes is at an early stage and the recent appointment of the Corporate Manager – Housing Options will assist with this.

A review of the lettable standard and achieving the benchmark average cost per void property will form part of the review of voids performance. A report will be presented to the Housing Board in September recommending a revised and (probably) aligned lettable standard.

Performance on average re-let times was also raised as an issue when the Finance, Risk and Performance Management – 2011/12 Year End Monitoring Report was considered at the 17 July meeting, paragraph 8.7.1 provides further information requested by Members.

Key Strategic Priority – Percentage of local authority housing rent collected – 95.3% has been collected against a target to exceed 99%. This has been attributed to two reasons; first an increase in outstanding arrears as a result of significant delays in the assessment of Housing Benefit claims through the Shared Revenues Partnership (SRP); and second because in the first quarter we are required to bring forward outstanding arrears from the previous year which always skews this figure. Officers will adjust the quarterly profile of this measure to allow for this.

Key Strategic Priority – To tackle under-occupation of council housing by encouraging a minimum of 50 homes to be freed up through people downsizing. At 30 June 2012 7 requests have been processed. This target is unrealistic when compared to last years actual of 27. This target needs to be reconsidered.

8.4 Balanced Scorecard Performance - Place Directorate

8.4.1 Areas of good performance

Key Strategic Priority – Number of garden waste collection service customers – the number of garden waste collection service customers at the 30 June has exceeded the annual target of 7,930. A total of 8,143 residents has subscribed to the service.

8.4.2 Areas of under-performance

Key Service Indicators – Determining planning applications

Before several major planning applications could be determined significant negotiations were necessary before they could be presented to Members for consideration. Approval of a number of these applications released land for housing and was therefore seen as an opportunity to positively contribute to the supply of housing land. The national target is to determine 60% of major planning applications in 13 weeks, extended negotiations resulted in the actual performance for the period falling short of this target, actual performance was 45.5%.

Resource issues are having an adverse impact on ability to determine minor and other planning applications. The national target for determining minor and other planning applications in 8 weeks is 65% and 80%, actual performance for the period was 59.5% and 71%.

As planning is such a key service, and particularly with regard to the under performance, Members have agreed to undertake a fundamental review of how the service is provided. JMIB will be receiving updates on this work which is being undertaken by a Member and Officer group supported by the Planning Advisory Service. This project will continue into the spring of 2013 and will involve a redesign of the service to ensure that it is responsive and achieves good quality outcomes whilst also meeting the needs of the community that it serves.

8.5 Balanced Scorecard Performance – Service Integration and Transformation

JMIB has agreed the key elements for the transformation programme which it will manage and monitor throughout the coming year. Detailed plans and measures for the key elements are being drawn up and will be fed into the Balanced Scorecard. Members will be aware that the community engagement programme is underway and the management restructure has been completed with 81 posts reduced to 46.

8.6 Financial Performance

8.6.1 The Corporate Organisation segment of the Balanced Scorecard includes a series of financial monitoring indicators reflecting certain aspects of the finances of the organisation.

8.6.2 Separate financial reports providing more detail on expenditure and income compared to this year's Budget (for the General Fund, HRA and capital programme) will be submitted to this Committee.

8.6.3 Whilst we are on course to achieve the 2012/13 savings as set out in the business case for transformation, a further major challenge for each Council is to achieve approx. an additional £3.5m savings over the 3 years from 2013/14.

8.7 Responses to performance issues raised on the 'Finance, Risk and Performance Management - 2011/12 Year End Monitoring Report'

8.7.1 Average Time to re-let local authority housing (former BV212) – request for more information regarding the 9 properties which were proving very difficult to let:

Why are there 9 properties that are difficult to let? Why is there no demand?

- 3 x very sheltered flats (VSH) in Sydney Brown Court, Hadleigh
 - Allocations are governed by the Suffolk County Allocation Panel, comprising officers from Babergh, Adult & Community Services (ACS) and Orwell Housing Association (managing agents of the scheme).

- VSH flats have become more difficult to let since the County moved away from providing core budgets to the support provider and started paying the tenants instead.
 - The funding arrangements at these schemes mean the customer must require a minimum of 10 hours care in order to qualify for a VSH service and a personal budget must be agreed as a condition of accepting a tenancy. These changes are having a similar impact on other providers of VSH services in Suffolk and the Council has been in dialogue with the County to find a way forward.
 - Since the introduction of the County's Flexicare strategy, ACS have prioritised assisting people to remain in their own homes over the provision of personal budgets for VSH schemes.
- 6 x sheltered flats (various locations)
 - Void time ranged from 56 days to 91 days. All of these were subject to multiple offers through the Choice Based Lettings process.
 - Refusals were due to the nature of the accommodation (the properties are mainly bedsit bungalows) and rural locations lacking amenities and public transport.

Why, if we remove the 9 properties from the stats, is the re-let time still above the target? Is it due to the condition of the properties?

- The average re-let period for general needs (non-sheltered) accommodation was 31 days. This is outside the target of 26 days.
- In some cases, Babergh will undertake significant works, such as kitchen and bathroom replacement, when a property is void. Officers have taken the view that it is more economical and efficient to do this work while the property is empty than to return to an occupied dwelling and work around the tenant. Although some "major" works can be discounted from the official void turn-around time, this has an impact on the average re-let time.
- A review of the Council's "lettable standard" as well as the voids processes, both in the maintenance team and the allocations team, will be undertaken now that the Corporate Managers are in post.

Where are the hard to let properties in Babergh?

- As explained in "1" above, properties in rural locations which lack amenities and public transport are harder to let than those in more urban areas. The position is the same in Mid Suffolk, with rural sheltered schemes being particularly hard to let.
- In response to the challenge of "hard to let" vacancies, Babergh began reshaping its sheltered housing stock in 2005. Members are aware that this plan was designed to reduce the number of unpopular flats on a gradual basis.
- Since this time, approximately 50 dwellings have been re-classified as general needs accommodation for people over 50.
- Mid Suffolk commissioned a report into its sheltered housing stock in 2010, which concluded that the problem is relatively minor. Nonetheless, both councils need to keep their housing stock and voids performance under constant review, particularly now that the HRA business plans are reliant upon maintaining the rental income stream.

8.7.2 Trade Waste – request for additional information on what is being done to improve trade waste performance:

It was initially envisaged that the trade recycling service in Babergh would be launched in 2011 with an anticipated first year tonnage of 850 tonnes. This was a significant over-estimate on two fronts. Firstly, the trade recycling service was not introduced in 2011/12 and secondly, the volume of material, if it had been introduced, was far too high.

The trade recycling service was not introduced in 2011/12 for a variety of reasons:

- A new trade vehicle was required and these vehicles have a long lead in time from ordering. The vehicle has now been delivered.
- The current trade collection rounds required re-routing in order to release one day per week to collect recycling. This has now been achieved.
- Consultation and marketing with trade customers who would be interested in the service. Many potential customers were contracted into existing contracts.

The new recycling service is due to start in September/October 2012 and new customers are signing up. This will commence with customers in the Sudbury and Great Cornard areas and then building up the round and customers from a solid base.

Mid Suffolk only collected 116 tonnes in its first full year of trade recycling, therefore 850 tonnes appeared to be an ambitious target.

BALANCED SCORECARD APPROACH

Appendix A

4 PERSPECTIVES

Ensuring outcomes/ outputs are delivered for the Communities and customers
Managing quality, performance and risks
Managing and delivering change
Managing and aligning resources

Key resource indicators:

- Financial Monitoring
- Savings and Efficiencies
- Commission and Procurement
- Workforce Measures

Key service indicators

Delivery Partnerships

Customer Satisfaction and Feedback/ Complaints
Key risks

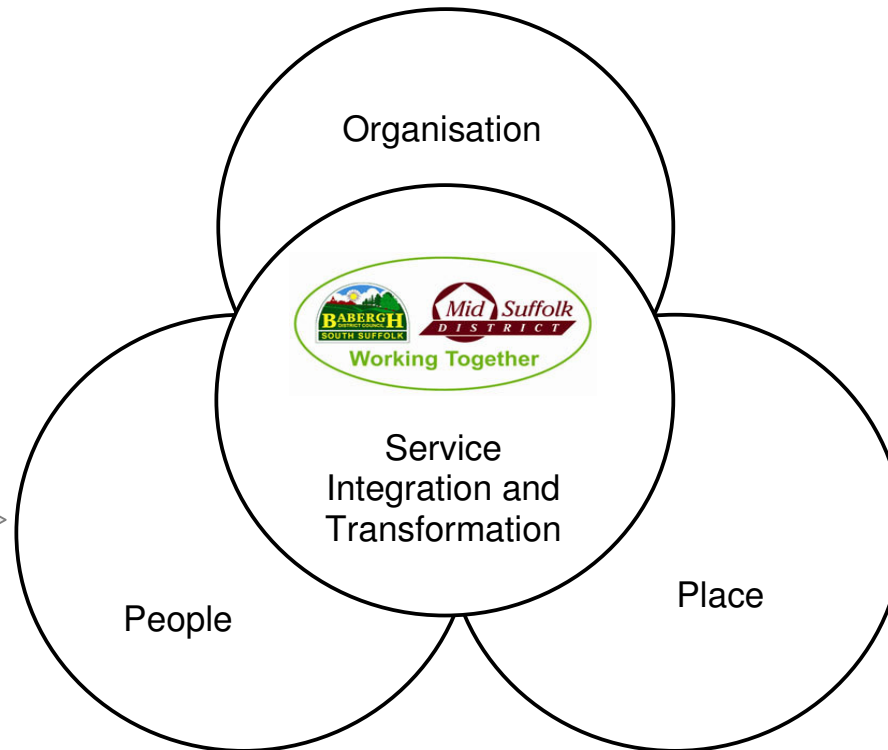

SERVICE INTEGRATION AND TRANSFORMATION

delivering the council's vision
Progress against the Business Case
Organisational Development
Key risks

Key Strategic Priority outcomes for:

- Meeting the Housing Needs of our Communities
- Improving the Health and Wellbeing of our Communities
- Developing Strong and Resilient Communities

Key service indicators
Delivery Partnerships
Customer Satisfaction and Feedback
Key risks

Key Strategic Priority outcomes for:

- Making our Environment Cleaner and Greener
- Supporting and Developing the Local Economy

Key service indicators
Delivery Partnerships
Customer Satisfaction and Feedback
Key risks

KEY INDICATORS AND MEASURES FOR PEOPLE, PLACE AND ORGANISATION

People

Key Strategic Priority outcomes

Meeting the housing needs of our communities

- Number of affordable homes completed (gross)
- Private dwellings returned to occupation
- Number of private sector homes adapted to meet the needs of older or disabled people
- Number of council homes adapted to meet the needs of older or disabled people
- Number of households prevented from becoming homeless
- Average time to re-let local authority housing
- Percentage of local authority housing rent collected
- Energy efficiency of local housing stock (average SAP rating)

Improving the health and wellbeing of our communities

- Performance measures have yet to be agreed by the Suffolk Health and Wellbeing Board. It is likely that they will be influenced by the Public Health Outcomes Framework 2013 to 2016

Developing strong and resilient communities

- Number of staff engaged in formal volunteering opportunities
- Number of Voluntary and Community Services (VCS) organisations supported and the amount of external funding delivered to community groups

Delivery Partnerships

- South Suffolk Leisure (SSL) KPIs – Babergh only
- Sport and Leisure Management (SLM) leisure contract indicators – Mid Suffolk only

Customer Satisfaction and Feedback

- Local authority tenants' satisfaction with landlord services
- Customer satisfaction with Choice Based Lettings (CBL)
- Customer satisfaction with SSL leisure centres – Babergh only
- Customer satisfaction with SLM leisure centres – Mid Suffolk only
- Complaints and compliments (Housing and Communities services)

Key service indicators

- Percentage of non decent council homes as a proportion of the total housing stock
- Number of households in temporary accommodation
- Number of incidents of criminal damage and serious public order offences in hotspot areas (Sudbury and Great Cornard wards) – Babergh only

Place

Key Strategic Priority outcomes

Making our environment cleaner and greener

- Percentage household waste recycled and composted
- Residual household waste per household (Kg)
- Percentage of trade waste recycled
- Number of garden waste collection service customers
- Improved street and environmental cleanliness – fly tipping score (on a scale of 1-4)
- Greenhouse gas emissions in the local area

Supporting and developing the local economy

- Percentage of homes and business that have access to high-speed broadband
- 16 –18 year olds who are not in education, employment or training (NEET)
- Number of young persons aged 16-24 claiming Job Seekers Allowance as a proportion of resident population of the same age

Delivery Partnerships

- SERCO waste contract measures (a set of 20 RCR indicators)
- Percentage of open space sites achieving 'satisfactory' status – Babergh only

Customer Satisfaction and Feedback

- Satisfaction of businesses with local authority regulation services
- Complaints and compliments (Environment and Economy services)

SERCO Tracker survey indicators:

- Satisfaction with street cleanliness (services provided by SERCO only)
- Satisfaction with refuse collections
- Satisfaction with recycling collections
- Satisfaction with garden waste collections
- Satisfaction with recycling centres or bring sites
- Satisfaction with special collection service

Key service indicators

- Percentage of major planning applications determined within 13 weeks
- Percentage of minor planning applications determined within 8 weeks
- Percentage of other planning applications determined within 8 weeks
- Planning appeals allowed against the authority's decision to refuse a planning application
- Percentage of planning decisions determined as delegated items
- Food establishments in the area which are broadly compliant with food hygiene law

Corporate Organisation

Key resource indicators

- Percentage of capital expenditure achieved against budget on the Housing Revenue Account (HRA)
- Percentage of capital expenditure achieved against budget on the General Fund (GF)
- Land charges income against projected income
- Planning and building control income against projected income
- Car parking income against projected income
- Percentage of top 5% earners that are women
- Percentage of top 5% earners that are from ethnic minorities
- Percentage of top 5% earners that have a disability
- Percentage of staff retiring early (excluding for ill health) as a % of total workforce
- Percentage of staff with a disability
- Percentage of staff from ethnic minorities
- Average no. of days sick per member of staff

Delivery Partnerships

- Customer Services Direct (CSD) contract indicators (Mid Suffolk only)
- Single Revenues Partnership (SRP) indicators:
- Average time taken to process Housing Benefit/Council Tax Benefit new claims
- Average time taken to process Housing Benefit/Council Tax Benefit change of circumstance events
- Percentage of Council Tax collected in the year
- Percentage of Non Domestic Rates collected in the year

Customer Satisfaction and Feedback

- Customer satisfaction – telephone (Babergh customer service teams only)
- Customer satisfaction – face to face (visitors to Babergh council offices in Hadleigh and Sudbury)

Key service indicators

- Percentage of invoices paid within 30 days if the goods or service have been supplied in line with an official order
- Percentage of main fundamental system audits completed as per the audit plan by 31 March 2013
- Number of Freedom of Information (Fol) requests received
- Percentage of all enquiries that are resolved at the first point of contact – Babergh only

Babergh Detailed Balanced Scorecard

Performance Rating	Key
Green	On track to be achieved by 31 March or ahead of time.
Amber	Progress is slightly off track, the action will be completed by 30 September 2013 not the 31 March 2013.
Red	Progress is significantly off track, the action will be significantly delayed or won't be completed.
Contextual	Authority has no influence on measure e.g. staff sickness
Yellow	Data will be available at year end e.g. surveys
Purple	Expected position at year end to be determined
Direction of Travel	Key
	No change
	Improvement
	Deterioration
